## CITES NATIONAL IVORY ACTION PLAN PROGRESS REPORT

Prepared as requested by the 74th meeting of the CITES Standing Committee

-----

Party: MALAYSIA

Reporting period: 6 October 2018 – 1 December 2021

-----

### **PART A: Synopsis of NIAP implementation**

Malaysia has been implementing the National Ivory Action Plan (NIAP) since September 2013, when it was first introduced in the 63rd and 64th Standing Committee meetings in Bangkok on 2nd and 14th March 2013.

In 2018, Malaysia revised its NIAP in accordance with recommendations by the 69<sup>th</sup> Standing Committee, to ensure that the actions in it respond to current threats. To firmly stating our position, Malaysia would like to reiterate that it does not have a domestic industry or market for ivory product but implicated in the illegal trade of ivory as a transit country. Malaysia's proximity to major markets and its well-developed port network have made the country a transit hub for wildlife smuggling.

The 11 actions developed and outlined in the revised NIAP are programmes aimed to strengthen our enforcement efforts in combatting the illegal trade of wildlife particularly ivory. One of the significant achievements of the NIAP implementation in the past three years is the passing of Wildlife Conservation (Amendment) Act 2021 which provide stringent penalties for wildlife crimes. Another notable initiative is the award winning *Operasi Bersepadu Khazanah*, an enforcement collaboration between various agencies launched in 2019 with main objective to apprehend the wildlife criminals and disrupt their networks.

Overall, Malaysia had substantially achieved the milestones set out in the NIAP and is on track to in developing specific national level risk profiles and indicators to combat wildlife trafficking. Malaysia is committed to ensure the successful implementation of the NIAP and appreciates the continuous support from CITES Secretariat and other partners.

In 2019, Malaysia launched a special initiative to increase the protection of tigers - "Save Our Malaysian Tiger Campaign". Under this campaign, Malaysia set up the Operasi Bersepadu Khazanah (OBK) taskforce to protect Malayan tigers from poachers and to increase patrols in protected areas of peninsular Malaysia. OBK has led to arrests of 87 wildlife criminals (49 foreign, 33 local), destruction of 460 wire snares and a total seizure valued at MYR 2.7 million (approximately US\$670,000). OBK combined the forces of the Department of Wildlife and National Parks (DWNP) Peninsular Malaysia and the Royal Malaysia Police, who also worked closely with state agencies and non-governmental organizations. With the operation's success, the taskforce has expanded geographical operations into Sabah and Sarawak in West Malaysia to further protect wildlife from environmental crime.
