

CITES-ESCAP Regional Workshop on Electronic CITES Permitting Systems

Country report

Ministry of Environment, Climate Change and Technology

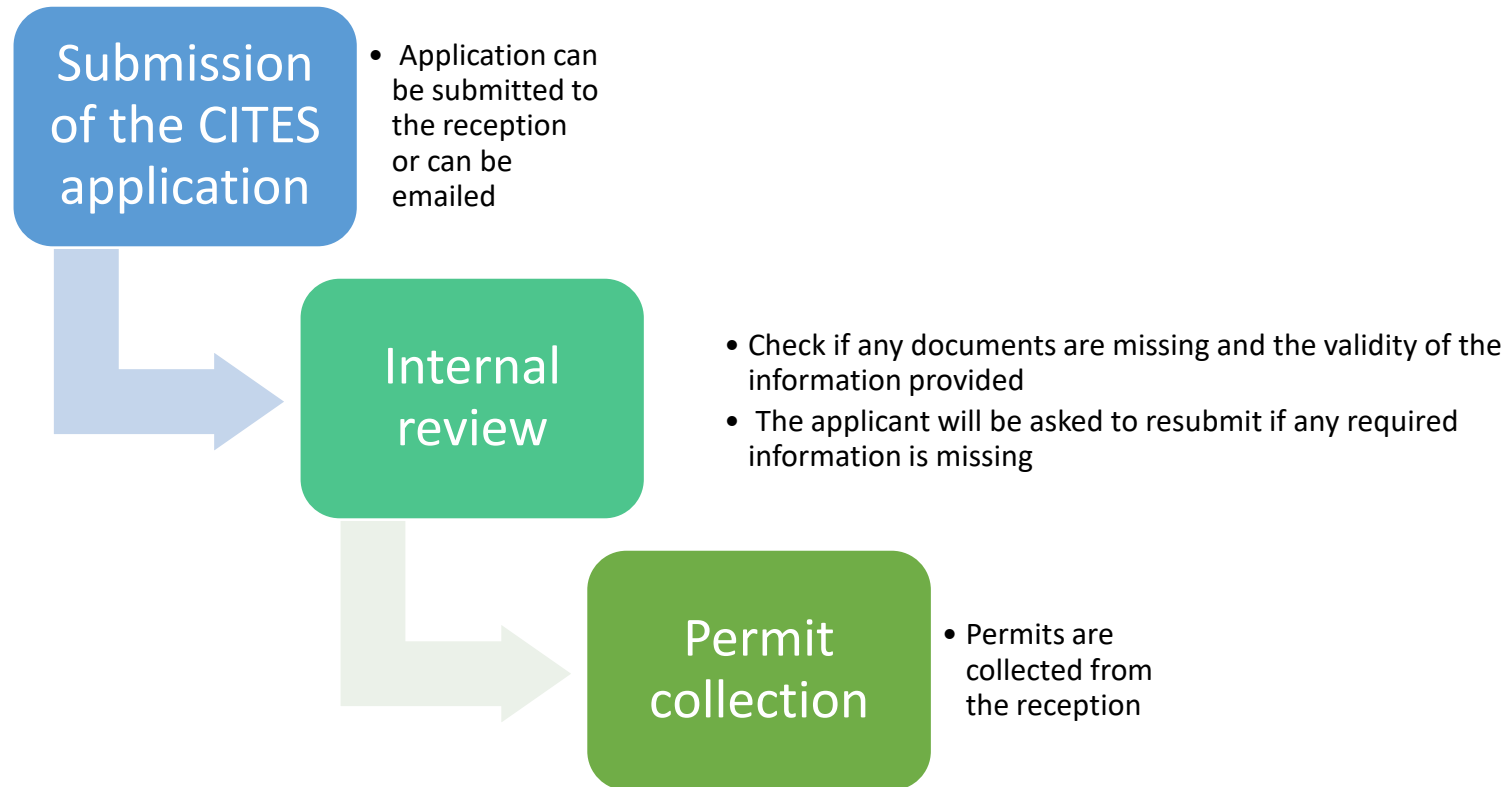

Management Authority of CITES, Maldives

Current CITES Permitting processes

Maldives have a paper based process to issue CITES permits

Challenges

- Since it's paper based, it is difficult to share information with Enforcement authority and scientific authority than it would be if an online system was established
- More paper work to keep a track of data and information

Future plans for implementing eCITES

- Applied to Green fund of Maldives to secure funds for e-permitting systems
- We further seek technical and financial support to implement eCITES

A vertical spiral binding on the left side of the page and a paperclip at the top left.

Thank you
